

Finding the good

Treatment Foster Parents Needed

Marymound's Treatment Foster Care Program (TFC) is seeking treatment foster parents.

TFC provides children and youth with a therapeutic living environment to grow, develop and experience belonging. Caregiving can be carried out by individuals, couples and families. A foster parent's role is to nurture, support and care for children and youth currently unable to reside with their natural families. There is a focus to connect youth with their community and families and in supporting family reunification whenever possible.

We are presently taking inquiries from individuals interested in becoming treatment foster parents. Previous experience working with high needs children and youth is an asset. As part of our TFC Program, you will receive extensive support and the benefit of our monthly training sessions.

Please note that COVID-19 vaccination status is required for all Marymound Treatment Foster Care homes.
